National Transportation Week: Second Week in May

Lisa T. Abbott and John P. Abbott

ABSTRACT

The topic of transportation incorporates a vast amount of divergent information. The subject matter varies greatly, and includes titles ranging from Camels of the Outback to The Great American Motion Sickness; or Why You Can't Get There from Here. To establish boundaries for this resource guide, the present authors referred to Public Law 87–449, 14 May 1962, which authorized the president to proclaim an annual National Transportation Week. Using this as a basis, they defined transportation as the movement of people or goods from one place to another, and included a little tourism to break up the concrete and steel. While some historical materials are included, this resource guide emphasizes modes of transportation currently used in the United States.
INTRODUCTION

The topic of transportation incorporates a vast amount of divergent information. The subject matter varies greatly, and includes titles ranging from Camels of the Outback to The Great American Motion Sickness; or Why You Can't Get There from Here. To establish boundaries for this resource guide, the present authors referred to Public Law 87-449, 14 May 1962, which authorized the president to proclaim an annual National Transportation Week. Using this as a basis, they defined transportation as the movement of people or goods from one place to another, and included a little tourism to break up the concrete and steel. While some historical materials are included, this resource guide emphasizes modes of transportation currently used in the United States.

The arrangement of the guide is by type of resource, rather than by mode of transportation. Materials are listed alphabetically within each section. The guide includes most types of materials, with the exception of journal articles and audio-visual media. It is not meant to be complete, but is designed to identify a cross-section materials that are likely to be available in medium-sized public and academic libraries. This resource guide includes the following sections: General; Abstract Journals, Bibliographies, Databases and Indexes; Career; Dictionaries, Directories, Encyclopedias, Guides, and Handbooks; Juvenile/Young Adult; Legal; Maps; Statistics; and Travel.

GENERAL

* 4.1 *

This book provides a foundation for understanding the United States transportation system. Topics covered include the scope and role of
transportation, transportation environments, and management and administration.

* 4.2 *

This text discusses the role and significance of transportation, basic modes, theory and practice of rates, the government's role, managerial issues, and the changing environment of transportation. This work is well-organized, and most chapters include study questions, notes, suggested readings, and case studies.

* 4.3 *

This book provides an analysis of the world's rail systems. The contents include: principles and parameters, technology, production, sales, management, and macrosystems. The author discusses international organizations involved in standardization and coordination of rail systems.

* 4.4 *

The author discusses the roles of three groups in the United States domestic freight and passenger transportation system. The groups are users of transportation services (shippers, receivers, and passengers), providers of transportation services (carriers), and the government (federal, state, and local).
4.5

This volume provides an overview of the structure, regulation, and performance of domestic inter-city transportation. The discussion includes six parts: scope and function, modes of inter-city carriage, cost and demand, regulation and promotion, management problems and policy issues, and metropolitan transportation. A bibliography follows each section.

4.6

This annual publication contains financial and operating data for nine hundred North American companies in all areas of transportation. Weekly Transportation News Reports supplement the annual editions.

4.7

This work discusses future systems of sea transport.

4.8

The book relates the history of roadbuilding through photographs from the nineteenth and twentieth centuries. Coverage extends from the Indian trails to plank roads to modern freeways. This is one of the most interesting books examined for this bibliography.
* 4.9 *

This service includes abstracts of the National Technical Information Service's technical reports dealing with air, pipeline, surface and subsurface transportation, transportation safety, and global navigation systems.

* 4.10 *

This work provides a subject listing of books, reports, conference proceedings, journal articles, and dissertations on transportation compiled by the Transportation Library. The book's scope is international.

* 4.11 *

This book is divided into two sections. Abstracts of journal articles, research reports, and conference proceedings papers are grouped by broad subject area in the first section. In the second are author, corporate source, and subject indexes. The scope of the work is international. HRIS is one subfile in the TRIS online database (Dialog file 63) cited below.
* 4.12 *

This is an annotated bibliography and guide to resource materials in the broad areas of transportation, materials management and physical distribution.

* 4.13 *

A subject index provides access to this bibliography. It is somewhat dated but still useful.

* 4.14 *
Sources of Information in Transportation. 3d ed. 9 vols. Monticello, IL: Vance Bibliographies, 1985. Public Administration Series, P-1599 - P-1607. ISSN 0193-970X.

Bibliographies covering topics such as air, shipping, rail, trucking, inland water, pipelines, and motor and urban transportation are contained in this series.

* 4.15 *

This is a bibliography of approximately 475 sources published between 1976 and 1980. It brings together literature prepared by individuals, private organizations, research institutions, and government agencies.
* 4.16 *

The TRIS online database is "a composite file whose records are either abstracts of documents and data holdings, or resumes of research projects that are relevant to the planning, development, operation and performance of transportation systems and their components." [from Dialog Bluesheet no. 63.] TRIS includes air, highway, maritime, rail, and urban mass transit subfiles. Most subfiles date from the mid-1970s. The TRIS database contains approximately 175,000 records.

CAREERS

* 4.17 *

This work highlights transportation careers, and provides activities to give the reader the feeling and experience of the occupation's actual work environment. The text is written for a juvenile/young adult audience.

* 4.18 *

The authors discuss the basic concepts and careers available in the energy and transportation industries. The material is written for the young adult.
* 4.19 *

This work gives the reader general advice on employment and job hunting. There are also specific discussions of employers and opportunities in various transportation-related industries, including aviation, automobile, rail, bus, ship, tour and travel, food service, and hotels. The book features a directory of trade and professional organizations.

**DICTIONARIES, DIRECTORIES, ENCYCLOPEDIAS, GUIDES, AND HANDBOOKS**

* 4.20 *

This work consists of "definitions, illustrations and descriptions of railroad cars and locomotives, their components for domestic and export service, and shop practices. Directory of car and locomotive repair facilities, and...an almanac."

* 4.21 *

This dictionary contains definitions of contemporary tourism industry terms.

* 4.22 *
The directory provides access to transportation collections via alphabetic, subject, personal, and geographic indexes.
* 4.23 *

This work offers an A to Z treatment of historical and contemporary aircraft. Illustrations, technical tables of aircraft specifications, and a small glossary are also included.

* 4.24 *

This work discusses the development of locomotives, famous trains, and the history of rail travel. Sections also cover train operation, rapid transit, station architecture and preservation, and biographies of railroad personalities. A railroad chronology and glossary enhance this nicely-illustrated volume.

* 4.25 *

This book consists of a survey of the myriad varieties of boats and ships worldwide, biographies of famous seafarers and naval designers, and a roster of outstanding ships. It includes extensive illustrations.

* 4.26 *

This work provides an overview of travel by rail. It covers North America, West Europe, East Europe, Middle East, and South and Southeast Asia, South Asia, the Pacific, Africa, and South America. Some information may be dated.
This series provides illustrations, descriptions, and specifications of aircraft arranged by type (airplanes, drones, missiles, etc.), and by country of origin. Indexes are available by type, manufacturer, and model. The index covers the previous ten editions.

This chronology of aviation history includes a directory, the history and fleet of world airlines and a directory of world air forces, bases, personnel and equipment sizes. The indexing is thorough.

This is a directory of the world's railway companies listed by country. It describes company narratives, officers, route lengths by gauge, equipment, and investments and finances. Additional directories contain rail equipment manufacturers, associations, agencies, and rapid transit systems.

This annual publication contains port data for over three thousand ports. The arrangement is by nine geographical regions, by country, and then alphabetical by port location. Port information includes geographic coordinates, port authority, approach, pilotage, accommodations, provisions, water, ship repair, and Lloyd's agents.
* 4.31 *
OAG Air Cargo Guide. 1971-. M. $57. OAG Inc., 2000 Clearwater Dr., Oak Brook, IL 60521. Ed: Herbert H. Howe. ISSN 0191-I52X.

The guide provides domestic and international cargo flight schedules, restrictions, packaging, maximum weights, and a destinations directory.

* 4.32 *

* 4.33 *

The worldwide edition covers schedules of flights to, from and within Central and South America, Greenland, and the Eastern Hemisphere (Europe, Asia, Africa, and Australia). It includes schedules from these areas to and from North America.

* 4.34 *

This serial lists freight and piggy-back schedules of many carriers, as well as lists of the officials of railroad systems in the United States, Canada, and Mexico.

* 4.35 *
This guide contains timetables for Amtrak and other passenger railroad lines in the United States, Canada, and Mexico. Some foreign bus, ferry, and train schedules are also included.

* 4.36 *
Ports Annual. 1917-. A. $25. Anchor Press, 1434 St. Catherine St. W., Suite 204, Montreal, Quebec H3G 1R4, Canada. ISSN 0225-5448.

This annual publication covers all major United States ports facilities, activities, and multi-modal services. The connecting transportation and trade operations are also listed.

* 4.37 *

The dictionary provides a guide to terms used in the modern railroad industry. It does not include slang from the steam era unless the words are still in use.

* 4.38 *

This single volume illustrated encyclopedia covers land, sea, and air transportation, transportation milestones, and related topics such as fuels, personalities, and navigation.

* 4.39 *

This directory lists federal, state, and local road and transportation building agencies and personnel.
Ziff-Davis Publ. Co., 1156 15th St. NW, Washington, 
DC 20005. ISSN 0043-826X.

This directory covers domestic and international 
air carriers, including officers, equipment, and basic 
financial information. It also lists airports, heliports, 
equipment manufacturers and suppliers, aviation 
repair facilities, and civil and military aviation 
agencies.

**JUVENILE/YOUNG ADULT**

* 4.41 *

Charlie Brown and the Peanuts gang help present 
a host of facts about various modes of transportation 
in a question and answer format for students 
in grades four through seven.

* 4.42 *
The Complete Junior Encyclopedia of Transportation. 

This is an encyclopedic treatment of transportation 
topics written and illustrated for a young 
reader.

* 4.43 *

The author discusses the use and construction 
of oil tankers, and describes the atmosphere on 
board.
* 4.44 *

This encyclopedia contains specific information on civilian and military airplanes ranging from design and designers to technical concepts and terms. The volume is well-illustrated.

* 4.45 *

This book introduces readers in fourth through sixth grades to various types of ships and boats. The author highlights the text with historical facts.

* 4.46 *

The author covers the history and operation of helicopters and includes a good glossary and an index. Other works in the series include: Airplanes, Airports, Cars, Ships and Seaports, and Trains.

* 4.47 *

The work provides a look at historical and current transportation methods.

* 4.48 *

This book highlights the 150-year history of railroads and describes modern railways, monorails, electric trains, and underground systems.

Ships and Docks covers water transporters from merchant ships to whaling vessels. The book also discusses boatbuilding, propulsion, navigation, safety, salvage, and engineering. It contains numerous illustrations and photographs.

This volume traces transportation from rope bridges to space travel using an encyclopedic format. Four hundred line drawings illustrate the concepts.

The author describes various features of airports, including the control tower, operations room, boarding, and customs.

Legal

This thorough work examines the regulation of carriers and transportation. It discusses the nature and administration of regulations in three sections: "Framework of Regulation," "Regulatory Policy," and "Practice, Procedure and Court Review."

This volume provides an exposition of the laws and court cases affecting the transportation industry.

* 4.54 *

* 4.55 *

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the executive departments and the agencies of the federal government. This is a division of the code into fifty titles which represent broad areas subject to federal regulation. Title 23 covers highways and is in one volume. Title 49 covers transportation in nine volumes.

* 4.56 *

These are the laws of the United States concerning transportation.

**MAPS**

* 4.57 *

A wonderful but somewhat dated resource that "was designed to be of practical use to decision makers in government and business, planners, research scholars, and others needing to visualize country-wide distributional patterns and relationships between environmental phenomena and human
activities." [from the introduction]. A new edition is long overdue.

* 4.58 *

This atlas is an essential reference source. It contains United States and Canadian road maps; interstate maps; a mileage and driving time map; a list of scheduled airlines servicing each state; a list of railroads serving the United States with miles of track, locations, and types of service; an Amtrak map with railroad distances; and population, economic, and statistical information for the United States, Canada, and other parts of the world.

* 4.59 *

This is an inexpensive atlas of highway road maps arranged by state. It also features city maps and less detailed maps of Mexico and Canada, and contains mileage tables and time-traveled maps.

* 4.60 *

This volume provides a worldwide list of tourist guides, topographic maps, road maps, aeronautical maps, and historical maps that are available for purchase.

**STATISTICS**

* 4.61 *
Census of Transportation. 1963-. Quinquennial. U.S. Department of Commerce, Bureau of the Census,
This document consists of four surveys. The National Transportation Survey provides data on volume and characteristics of travel by United States citizens. The Truck Inventory and Use Survey collects data on the characteristics and operational use of the nation's privately-owned truck resources. The Commodity Transportation Survey provides statistics on the volume and characteristics of intercity commodity shipments originated by manufacturers. Finally, the Nonregulated Motor Carriers and Public Warehouse Survey presents data on motor carriers of persons and property that are not subject to federal regulation.

* 4.62 *
Highway Statistics. 1945-. A. U.S. Department of Transportation, Federal Highway Administration, Washington, DC. SuDocs no. TD 2.23: (year). ISSN 0095-344X.

This annual report presents an analysis of statistics on motor fuel, motor vehicles, driver licensing, highway-user taxation, state highway finance, highway mileage, and more. There are annual cumulations.

* 4.63 *
National Transportation Statistics. 1977-. A. U.S. Department of Transportation, Research and Special Programs Administration, Washington, DC. SuDoc no. TD 10.9: (year). ISSN 0161-8628.

This annual provides a summary of transportation statistics from government and private sources. Reports include cost, inventory, and performance data describing the passenger and cargo operations of several transportation modes: air carrier, general aviation, auto, bus, truck, local transit, rail, water, and pipeline.

* 4.64 *
National Travel Survey. 1979-. Q. with annual cumulations. $65. U.S. Travel Data Center, 1899 L St. NW, Washington, DC 20036. ISSN 0737-2620.
This survey presents statistical information and summaries on many factors related to travel, including mode and purpose of travel, characteristics of travel, and traveler. The annual cumulation contains a glossary.

**TRAVEL**

* 4.65 *
This guide gives information about luxury cruises sailing from the United States, the Caribbean, the Mediterranean, and Europe. Sailing dates, fares, and ports of call are listed.

* 4.66 *
This is an ambitious bibliography in two parts within three volumes. "Geographical Bibliography and Resources" contains travel and tourism citations by regions and countries of the world. This volume also includes less familiar countries such as Brunei and the Kingdom of Tonga. "Subject Bibliography and Resources" contains citations of materials on travel and tourism topics, including the hospitality industry, leisure activities, and transportation.

* 4.67 *
Grimes offers practical tips for traveling in the United States and abroad. He includes information on the Eurail pass, renting "wrecks," discounts for older travelers, special diets, lost luggage,
and sections on traveling in South America, Africa, China, and the Soviet bloc.

* 4.68 *

This reference tool offers entries for over ten thousand hotels and motels listed alphabetically by state and city. Each entry includes rates, distance to airport, and on-premise facilities. State highway maps and sixty city maps show hotel locations. A meeting planner's guide lists meeting room sizes and audio-visual equipment availability.

* 4.69 *
Hotel & Travel Index. 1939-. Q. $60. Hotel & Travel Index, PO Box 5820, Cherry Hill, NJ 08034. Ed: Jerry Preece. ISSN 0162-9972.

This quarterly publication lists worldwide information on thirty thousand hotels, resorts, motels, guest ranches, and lodges. It reports on the hotel size, rates, distance from city center, nearest air terminal, airlines, and car rental agents. Entries are arranged in eight geographical regions.

* 4.70 *

Massow discusses issues of interest to the mature traveler, including the question of whether to travel alone or with others, air versus surface travel, medical concerns, and whether to travel in the United States or abroad. The book includes three appendixes: 1) state and national tourist offices, 2) reading list, and 3) maps of key tourist sites.
NOTE

Country-by-country travel book series, such as Fielding's Travel Books, Fodor's Modern Guides and Ford's Travel Guides, contain useful tourist information on most countries in North, South and Central America, Europe, Asia, Africa, and Australia, and the Pacific. The titles are too numerous to list, but all contain advice and recommendations about travel, accommodations, food, shopping, and local customs.
