

Figure 8. Pre-treatment mean oocyte diameter (mm) of black sea bass eggs under different hormone treatments. Data represent means \pm standard error ($N = 6 - 21$). Letter indicates hormone (L = LHRH-a, G = GnRH-a), number indicates dose ($\mu\text{g}/\text{kg}$), and word indicates release rate (slow or fast). No significant ($P > 0.05$) difference among treatments were observed.
