The Need for Empirical Research

Technology

Social Justice

Definition Problem

Methodology: Email Interview

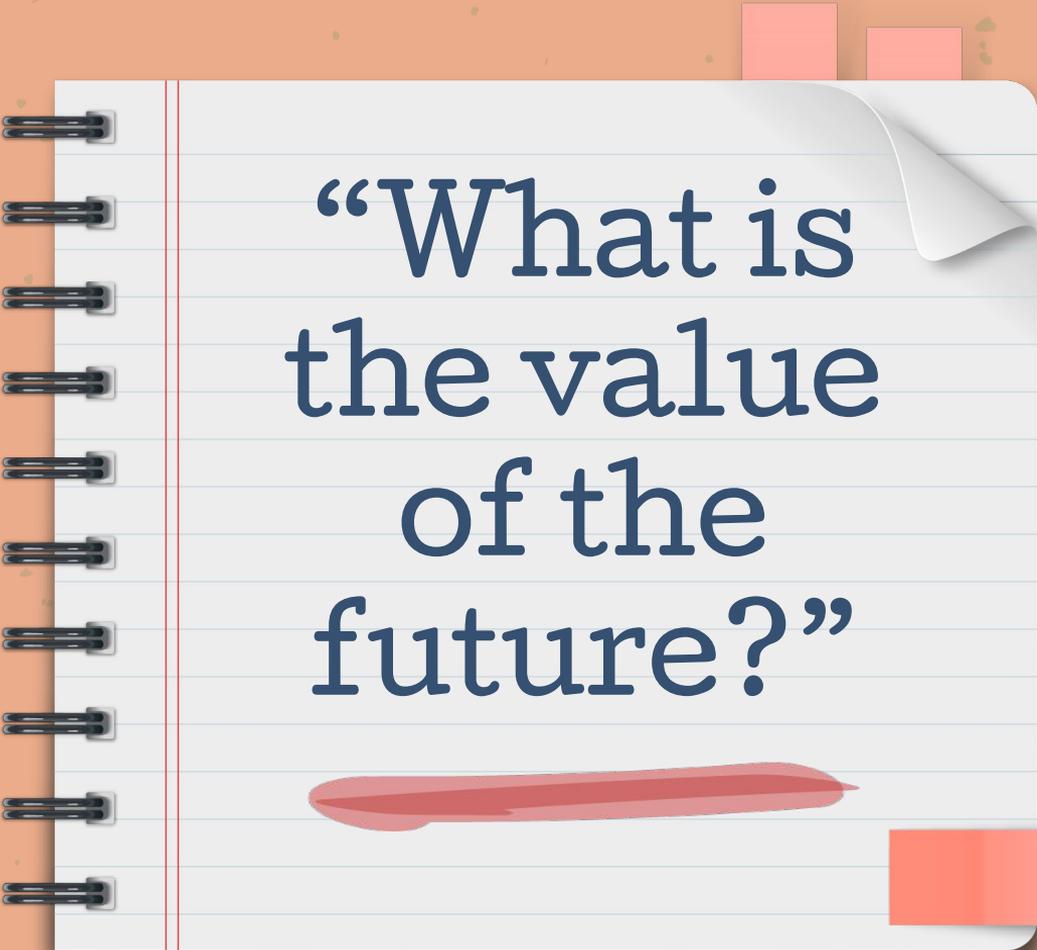

- What visual literacy skills and competencies do you consider necessary for success in your discipline?
- What do you consider to be the unique visual literacy concern(s) or challenge(s) for students or audiences in your area of expertise?
- Is assessing the visual literacy competencies of others part of your work?
- What do you consider to be the most pressing concern(s) (e.g. credibility, diversity, equity, inclusion, manipulation, technology, and/or trust) surrounding images and/or visual media today? Please explain your reasoning.
- How do you see new technologies (such as augmented reality, deep fakes, etc.) affecting our understanding of visual literacy?
- What challenges and opportunities do you see for the field of visual literacy moving into the 21st-century?

The 3 Phases of a Futures Literacy Process

Miller, R. (2007).
Futures literacy:
A hybrid strategic
scenario method.

Awareness

Change happens over time, and we are situated in moments in time.

Choice

Build our awareness and insights to act strategically today, in line with the values we prefer.

Rigorous Imagining

What is possible, what is probable, and what is preferable?

Time for discussion!

- You will but put into a Zoom “breakout room” with other attendees for ~10 minutes.
- Quickly choose someone to be the notetaker/reporter for your group.
- Discuss the prompt and have the notetaker report on your group’s ideas in the **Google Form**.
- Submit the form when you get the automated one minute countdown from Zoom!

How do you see yourself putting a *Framework* companion document for visual literacy into action?

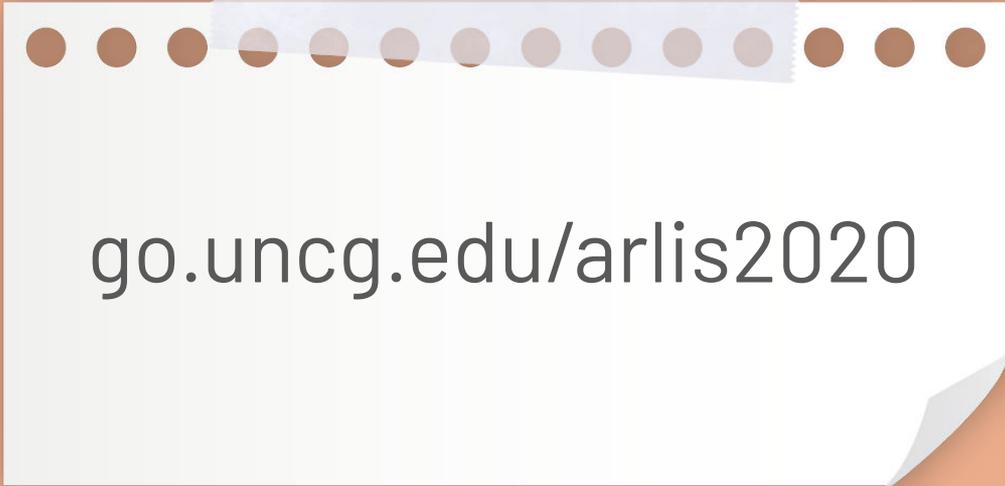

Discussion Prompt #1

Construct a scenario in which you would engage with a VL companion document from your own present context, or an imagined future context. What does your professional role look like in this scenario? Describe how, and why, you might use the companion document. We have some sample scenarios, or you can use your own!

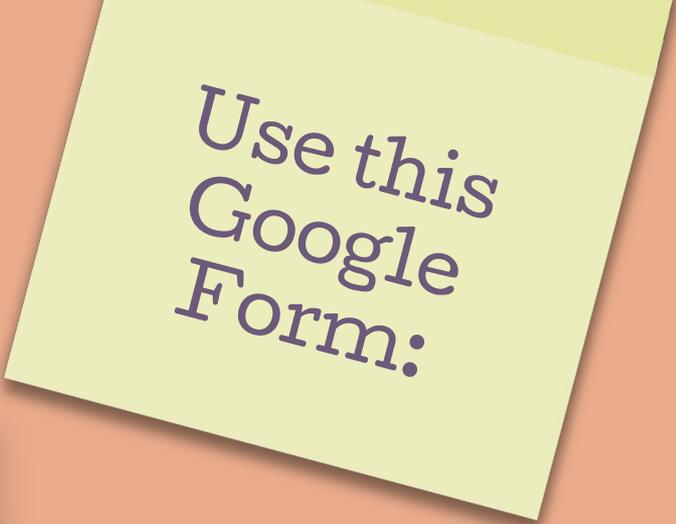

Sample Scenarios (for brainstorming):

- Developing a curriculum map for a liaison area
- Writing student learning outcomes for lessons or interactive learning objects
- Working with a studio art course to curate a pop-up or digital exhibit from materials in your special collections or archives
- Hosting a zine-making workshop for non-arts majors
- Constructing rights policies around potential use cases for your visual resources collection

How can we write a *Framework* companion document for visual literacy that has longevity?

Discussion Prompt #2

Share your thoughts about how we can create a document that you could use not just now, but over the next decade. Think about the future of your role and our profession. What changes and challenges do we face? What trends or shifts should we anticipate? How can this document stay relevant and useful?

Next Steps & Timeline

Fall 2020

Complete our empirical research study (qualitative coding & text analysis).

Fall/Winter 2020

Recruit an advisory board.

Winter/Spring 2021

Finish companion document draft based on research and feedback.

Spring 2021

Submit to IRIG (and hopefully present at ACRL).
